

PCI, PCF and PCE, with PCP and PCA - International Communist Parties  
By Jacques De'lardga

I. Althusser's writings for the Communists in Europe and in Argentina  
(1968 - 89)

In this period we just equate Ideology and ideological struggle with the whole movement - it means even Sartre is about ideology and even Marxist class action is actually about ideology - we even communicate that this is all we mean.

When I argue that the economic crisis has led to protests, I mean to be contradictory actually according to our party papers - actually economic crisis leads to ideological crisis and even complete break down.

II. Recent Sirohian Interpretations - Of Althusser, and Sartre, even Sirohi  
(1999 - 2020, 2020 - 24, current phase especially)

And so Sirohi argues let us be a mass line party - a Party of the Paris Commune or even Chinese Culutral Revolution period - he means just pass a line from period to period, conjuncture to conjuncture and make it massist.

Our interpretation of Althusser becomes - ideological struggle and even ideological philosophy, or our current ideology is then our current class action and our current mobilization - if there is news it is only Sirohi, because in fact there is bourgeois ISAs which oppress the people and Communists as well - let us call instead for mass protest anyway - let us fight the ideological struggle with class struggle - a crisis means a chance at further ideological struggle and class struggle.

The route to class struggle is intellectual action on ideological crisis and strengthening our discourse in fact in French, Italian and Spanish or Portuguese in that language we act - it becomes mass line when we speak their language - imagine communicating to all the working class - entiendo tu problemas - queremos contractos de empleos y tambien wages, la pagar.

This becomes mass line and does mobilize masses again - in fact since the 1989 fall of Soviet Union.
